Art Unit: 2736

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6 and 15-22, drawn to display peripheral input devices, classified in class 345, subclass 156.
  - II. Claims 7-9, drawn to a multiple switch, classified in class 200, subclass 1R.
  - III. Claims 10-14, drawn to operator interfaces, classified in class 395, subclass 155.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because many different switches can be used to accomplish the same results. The subcombination has separate utility such as audio control means.
3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any display

format can be used in the combination. The subcombination has separate utility such as a keyboard controlled display.
